

Amendments to the Specification:

Please replace paragraph_[0046] with the following amended paragraph:

[0046] The technician uses the tool 250 as follows. First, the technician places the nut N in the recess of the first jaw 251, and positions the tool 250 so that P clamp 14 resides between the jaws 251, 253. The technician then advances the ~~actuator 55~~actuator 255 with assistance from a power tool ~~(not shown)~~. Since the head of the rod 275 matches the head of the bolt B, the technician can use the same power tool as will be used to tighten the P clamp 14 around the external 10.
